

SATAKE

SAVCO SALES PVT. LTD.

Grain Color Sorter : Model No RMGS1404DIS

ESTD. 1942

DESCRIPTION

Satake Corporation accomplishes new RMGS Color Sorter, which is 16 times bigger than the RMGS841. More capacity for secondary sorting is considered, it relaxes per channel throughput capacity and it improves product yield and purity at the utmost level,

FEATURES:-

✓ CCD Camera

The Satake RMGS, with its extremely high resolution of 0.14mm, enables an outstanding sorting performance. Each camera's 2048 pixels view 280mm of sorting width enabling the machine to detect and reject minute defects with high accuracy.

✓ Recovery

Chute proportion can be selected. For those who would like big capacity 123 (Primary Secondary) is recommended. For those who would be keen to the yield, the proportion can be changed to 9:6.

✓ Capacity

The new hopper and feeder designs deliver greater and more controlled throughput for all products.

✓ Sorting Capability

The computerized control system of the RMGS series makes it flexible enough for multi-commodity use. It can be efficiently used for various commodities like Rice, Lentil, Pulses, Sesame Seeds etc. with equally good efficiency.

✓ Lower Air Consumption

The shorter distance between the ejector nozzle and grain to be ejected reduces compressed air consumption by two-thirds of conventional models.

✓ Usable

The sorter is equipped with a LCD Touch Screen. The touch screen has an easy user interface that makes the operation very simple and fast. The software has two operation modes "Maintenance" and "Operation" which make the maintenance of the machine even more simpler.

SPARE PARTS INFORMATION OF RMGS1404DIS

MODEL	PART NO	ITEM DETAIL
	B249230300	MOUNT FLUORESCENT LAMP
	B249231330	TROUGH MOUNT
	BFB407B03	MAGNET(GLS-M1) PROXIMITY SWITC
	B249230270	TROUGH
	BFB705421523	RODLESS CYLINDER (ORCA16X16)
