### PADDY SEPARATOR : Model No PS200D(2)-T

#### DESCRIPTION

The Satake Paddy Separator PS is an oscillation-type paddy separator with a very high sorting performance and an easy maintenance design.

All varieties of rice such as long grain, medium grain and short grain can be sorted easily and accurately.

It separates a mixture of paddy and brown rice into three distinct classes: paddy, mixture of paddy and brown rice and brown rice, to be sent to a husker, back to the paddy separator and to a rice whitener, respectively.

#### FEATURES

##### ✓ **Stable Performance:**

Adjustment during operation is not necessary because of its constant and stable separating performance.

##### ✓ **Minimized Installation Space:**

Compact design and large capacity means that installation space for a given separating capacity is very small.

##### ✓ **Automatic Stop Device:**

Machine automatically stops when the tank is nearly empty.

##### ✓ **Easy Sampling:**

Samples of brown rice can be taken from a special outlet by diverter valves, for easy inspection of quality and flow rate.

##### ✓ **Easy Inspection of Separating Condition:**

The discharge side is covered with a transparent cover so that the separating conditions of the grain are easily checked.

##### ✓ **Easy Flow Adjustment:**

Flow rates are adjusted by a manual remote lever on "D" model and by increase / decrease buttons on "DR" model.
