# SATAKE

## SAVCO SALES PVT. LTD.

### Rice Polisher : Model No KB35CM-T

#### DESCRIPTION

Satake innovates continuously and creates a marvel repeatedly. These new compact rice milling machineries are the latest in the list. These machines improve on existing design and incorporate various improvements to suit long grain milling in a gentle manner.

#### VTA'S FEATURES:

##### ✓ The Most Compact VTA:

This new model is suitable for small scale rice millers with compact size and also it can provide quality of milled rice same as existing VTA series.

##### ✓ Lower Milling Temperatures:

Due to improved design for air circulation inside the milling chamber and greater aspiration through the bran duct, the temperature inside the milling chamber is greatly reduced. This remains the good characteristics of rice while it is milled gently.

#### KB'S FEATURES:

##### ✓ Improves the Appearance of Rice:

The surface of milled rice becomes smooth and clean, leading to enhanced commercial value.

##### ✓ Gentle Polishing:

The Satake KB is designed to minimize breakage of rice kernels. Milling rolls and screens are chosen to best fit the material.
